Frontend Engineer · React, Next.js & Flutter

Frontend engineer with 3+ years of experience turning complex products into interfaces people find easy to use, on web and mobile. At PeekRide, a US rideshare startup, I work across the rider and driver app, the operations dashboard, the website and the API. I measure my work by what changes for users: faster pages, fewer dead ends, screens that work for everyone.

EXPERIENCE

PeekRide — 07/2026 – Present

Software Engineer, Frontend & Mobile — Remote · Rideshare startup, Atlanta, GA

Mobile app · Flutter

- **Made profiles readable at a glance:** Manage Account went from 4 tabs to 1 page, so riders and drivers see their details, rating and stats in one place.
- **Fixed the app on light-mode phones and iPads:** a light theme that passes WCAG AA, and text that had rendered at 2.5× size on tablets.
- **Turned silent payment failures into recoverable ones:** riders see the bank's real decline reason and a one-tap fix.

Admin dashboard · Next.js 15, React 19, TanStack Query

- **Made the dashboard faster:** removed a loading gate that held back first paint until up to 900 kB of JS had loaded, and cut the heaviest page's JS by 45%.
- **Replaced 35 one-off tables with one shared table** on 42 screens, with search, filters and CSV/Excel export.
- **Freed ops from developer requests:** they now publish the website's FAQ and legal pages from a rich-text editor.

Suwk Technologies — 04/2025 – 10/2025

React Developer (Contract) — Vocational training, Africa

- **Reached 1,000+ learners** with an LMS built as a Progressive Web App, cutting device-related drop-offs by an estimated 40%.
- **Cut manual processing by 50%** with a scholarship application portal used by hundreds of applicants.
- **Cut feature development time by 30%** with reusable UI components and shared Zustand state.

Lytical Technology — 07/2023 – 04/2025

React Developer

- **Reduced design-to-development discrepancies by 40%** by turning Figma designs into pixel-perfect React and Tailwind interfaces.
- **Reduced UI bugs by 20–30%** through code reviews with senior engineers, and led the team's adoption of CI/CD.

PROJECTS

PeekRide — Rideshare Platform

Flutter · Next.js · Laravel · Stripe · Pusher

- Live on the App Store and Google Play in metro Atlanta. One account can ride and drive. I've made 140+ commits across the mobile app, admin dashboard, website and API.

Kayglo Citadel — Solar Company Website

Next.js 16 · Tailwind v4 · GA4

- **Stopped losing leads** for a Lagos solar installer serving 13 states: every enquiry now reaches the team on WhatsApp, and GA4 shows where people drop out of the 4-step form.
- **Protected the business** by removing fake review markup that risked a Google penalty and stripping GPS locations from customer photos.

Suwk Website · E-Consultants Global

React · TailwindCSS

- **Increased Suwk's sign-up conversions by an estimated 25%** with interactive course previews.
- **Scored 100 for SEO and 94 for Accessibility in Google Lighthouse** on E-Consultants Global's corporate site.

SKILLS

Frontend	TypeScript, JavaScript, React 19, Next.js 15 (App Router), HTML, CSS
Mobile	Flutter, Dart, iOS & Android, theming, tablet layouts, Google Maps, push notifications
UI & State	TailwindCSS, Shadcn/ui, Ant Design, Framer Motion, Zustand, TanStack Query, React Hook Form
Practices	Accessibility (WCAG), performance, SEO, i18n, PWA, testing (Vitest, Mockito), CI/CD, Figma
Also	Laravel/PHP, PostgreSQL, Stripe, Pusher, REST APIs, Git, Vercel, AWS Amplify, AI-assisted development

EDUCATION

B.Sc., Computer Science
University of Ilorin · 11/2018 – 12/2022

CERTIFICATIONS

Introduction to Cybersecurity
Cisco Networking Academy
